Linnea M. Wolniewicz

Computer Science Ph.D. Candidate at the University of Hawai‘i at Mānoa and National Science Foundation Fellow

(+1)720-442-2341 | linnea@wolniewicz.com | linneawolniewicz.github.io | github.com/linneawolniewicz | linkedin.com/in/linnea-wolniewicz/ | Honolulu, HI

Education

University of Hawai‘i at Mānoa *Honolulu, HI*

Ph.D. in Computer Science **July 2024 - May 2027 (expected)**

M.Sc. in Computer Science, GPA 3.96 August 2022 - July 2024

Ph.D. Candidate (since June 2026) in Dr. Peter Sadowski's Machine Learning lab. Selected Coursework: Software Quality Assurance, Human-centered AI, Machine Learning, Deep Learning, AI for Dynamic Systems, Random Processes, Complexity Analysis, AI Seminar

University of Colorado Boulder *Boulder, CO*

B.A. in Astrophysics and Minor in Music (Harp performance), GPA 3.86 August 2018 - May 2022

Selected Coursework: *Astrophysics:* Classical Mechanics I, II, Electricity and Magnetism I, II, Quantum Mechanics I, Astrophysics I, II, Black Holes *Computer Science:* Algorithms, Principles of Programming Languages, Object-Oriented Programming, Data Structures, Scientific Programming I, II, III

University of Edinburgh *Edinburgh, UK*

Study Abroad August 2021 - December 2021

Coursework: Foundations of Quantum Mechanics, Scottish Studies, Celtic Civilizations

Technical Skills

Programming Languages Python, C++, bash, LaTeX. *Working knowledge:* SQL, Scala, JavaScript, HTML/CSS

Data Science PyTorch, TensorFlow, HPC, Pandas, Matplotlib, SLURM, GCP. *Working knowledge:* MATLAB, Mathematica

Employment and Research

University of Hawai‘i at Mānoa *Honolulu, HI*

Graduate Research Assistant August 2022 - present, full-time

I research the application of **probabilistic machine learning methods** to scientific data with Dr. Peter Sadowski. I am currently exploring the use of **Gaussian Processes** in **Python** to perform anomaly detection in stellar time series data with **PyTorch**. I have presented my work on accelerating **simulation-based inference** with **neural likelihood models** at NeurIPS and SPAICE [8, 2], which enables efficient Bayesian inference for the heliospheric transport of galactic cosmic rays.

NVIDIA *Santa Clara, CA*

SW-GPU Intern, PhysicsNeMo/Earth-2 Teams July 2026 - October 2026, full-time

Researched deep learning applications for climate science, developing generative satellite and radar weather models.

NASA Jet Propulsion Laboratory, Caltech *Pasadena, CA*

Research Intern, Machine Learning and Instrument Autonomy Group March 2026 - June 2026, full-time

Working with Dr. Umaa Rebbapragada, optimized ionospheric deep learning architectures to reduce runtime and resource costs, and built robust evaluation pipelines across geomagnetic storm conditions [1].

Frontier Development Lab *Remote*

Researcher at HelioLab June 2025 - October 2025, full-time

My team and I developed a novel dataset and suite of ML models in **PyTorch** to accurately forecast the state of the ionosphere, presented at NeurIPS [4, 5, 6].

Striveworks, Inc *Austin, TX*

Data Science Intern May 2023 - August 2023, full-time

I researched the application of **large language models** to solve natural language tasks, and explored various improvement strategies such as LoRA.

Laboratory for Atmospheric and Space Physics *Boulder, CO*

Undergraduate Research Assistant August 2020 - July 2022, part-time

I implemented K-means and **convolutional neural networks** in **Python** with **PyTorch** to segment polar coronal holes in images of the Sun [10].

Massachusetts Institute of Technology's Haystack Observatory *Westford, MA*

Research Experience for Undergraduates May 2021 - August 2021, full-time

I applied a Gaussian mixture model and **convolutional neural networks** to detect ocean wave events in seismic data from Antarctica's Ross Ice Shelf.

Institute for Astronomy at the University of Hawai'i at Mānoa *Honolulu, HI*

Research Experience for Undergraduates May 2020 - August 2020, full-time

I analyzed the entire Kepler Space Telescope dataset using **Python** statistical tools such as **Pandas** to evaluate the biases in its selection function [9].

University of Colorado Boulder *Boulder, CO*

Physics Learning Assistant August 2019 - May 2020, part-time

I taught students in an Introductory Experimental Physics and an Introductory Electricity and Magnetism Tutorial course.

Northern Colorado Harp Workshop *Fort Collins, CO*

Harp Internship July 2019 - August 2019, full-time

I facilitated a summer workshop for harpists, delivering instructional sessions, conducting rehearsals, and orchestrating the operation of the entire program.

Gamers Guild Boulder *Boulder, CO*

Store Manager August 2017 - May 2018, part-time

I addressed the needs of up to 20 customers simultaneously while overseeing the overall operations and responsibilities of the entire store.

Posters and Talks

NeurIPS 2025: Machine Learning for the Physical Sciences Workshop *San Diego, CA*

Poster Presentation December 2025

Connecting the Dots: A Machine Learning Ready Dataset for Ionospheric Forecasting Models [4]; Ioncast: A deep learning framework for forecasting ionospheric dynamics [5]; Forecasting the Ionosphere from Sparse GNSS Data with Temporal-Fusion Transformers [6].

Center for Decoding the Universe Annual Conference *Stanford, CA*

Scheduled Talk June 2025

Dipper Detector: Probabilistic Detection of Anomalous Dimming in Stellar Light Curves.

AI in and for Space (SPAICE) Conference *Oxford, UK*

Scheduled Talk September 2024

Neural Surrogate HMC: Accelerated Hamiltonian Monte Carlo with a Neural Network Surrogate Likelihood [2].

Science Understanding through Data Science (SUDS) Conference *Pasadena, CA*

Poster Presentation August 2024

Neural Surrogate HMC: Accelerated Hamiltonian Monte Carlo with a Neural Network Surrogate Likelihood [2].

Information and Computer Science Department Research Showcase *Honolulu, HI*

Poster Presentation May 2024

NeuralHMC: Accelerated Hamiltonian Monte Carlo with a Neural Network Surrogate Likelihood (Masters Project) [8].

NeurIPS 2023: Machine Learning for the Physical Sciences Workshop *New Orleans, LA*

Poster Presentation December 2023

NeuralHMC: Accelerated Hamiltonian Monte Carlo with a Neural Network Surrogate Likelihood [8].

Information and Computer Science Department Research Showcase *Honolulu, HI*

Poster Presentation May 2023

EINN: Evolutionary-Informed Neural Networks.

Machine Learning in Heliophysics *Virtual*

Poster Presentation March 2022

SEARCH: Segmentation of Active Regions and Coronal Holes.

National Conference on Undergraduate Research *Virtual*

Scheduled Talk April 2021

The Stars Kepler Missed: Investigating the Kepler Target Selection Function Using Gaia DR2 [9].

Cambridge Workshops of Cool Stars, Stellar Systems, and the Sun *Virtual*

Poster Presentation March 2021

SEARCH: Segmentation of polAR Coronal Holes [10].

237th American Astronomical Society (AAS) Meeting *Virtual*

Scheduled Talk No. 211.04 January 2021

The Stars Kepler Missed: Investigating the Kepler Target Selection Function Using Gaia DR2 [9].

NeurIPS 2020: Machine Learning for the Physical Sciences Workshop *Virtual*

Poster Presentation December 2020

SEARCH: Segmentation of polAR Coronal Holes [10].

Science Undergraduate Research Experience Symposium *Honolulu, HI*

Poster Presentation July 2020

The Stars Kepler Missed: Investigating the Kepler Target Selection Function Using Gaia DR2 [9].

Awards and Honors

Jan. & May 2024	Catalyst Award for Science Advancement (CASA) Grant
April 2022	National Science Foundation Graduate Fellowship
February 2022	T9Hacks Hackathon Outstanding Beginner
January 2019	University of Colorado Women in Physics Scholarship
Undergraduate	University of Colorado Boulder Dean's List and Honors Scholarship
May 2020 - present	Phi Beta Kappa Honors Society, Member
June 2018	Winner of the Harp Colorado Workshop Competition
May 2018	International Baccalaureate Diploma, GPA: 4.67

Service and Outreach

Graduate Women in Science Hawai'i *Honolulu, HI*

Vice President August 2024 - present

Outreach Coordinator August 2023 - July 2024

Vice President of Graduate Women in Science Hawai'i (GWISH), coordinating outreach across Hawai'i. Awarded CASA grants in January and May 2024 for the "Exploring Beyond: Inspiring Future Planetary Explorer-Scientists" program. Since Fall 2023, led coding and scientific research workshops across four Hawaiian islands and over 25 science classes, encouraging high school students, especially women and underrepresented students, to pursue science and higher education.

Information and Computer Science Department *Honolulu, HI*

Graduate Student Community Engagement Co-Chair August 2023 - present

My co-chair and I regularly apply for university funding to organize weekly Coffee Hours for graduate students and faculty to foster community within the Information and Computer Science (ICS) department at UH Mānoa. We also organize and maintain a communal space for ICS graduate students.

Graduate Student Organization *Honolulu, HI*

Information and Computer Science (ICS) Representative August 2022 - August 2024

I was the representative for the ICS Department at UH Mānoa for two years. I held this role within the Graduate Student Organization to develop a healthy environment for ICS graduate students, communicate graduate student needs with UH administration, and award funding to ICS graduate students.
