Linnea M. Wolniewicz

Ph.D. Candidate in Computer Science at the University of Hawai'i at Mānoa and National Science Foundation Fellow

720-442-2341 | linnea@wolniewicz.com | linneawolniewicz.github.io | github.com/linneawolniewicz | linkedin.com/in/linnea-wolniewicz

Education

University of Hawai'i at Mānoa *Honolulu, HI*

Ph.D. in Computer Science | M.Sc. in Computer Science (GPA 3.96) Aug. 2022 - May 2027 (expected)

Ph.D. Candidate since June 2026 in Dr. Peter Sadowski's Applied Machine Learning lab. Coursework: Machine Learning, Deep Learning, AI for Dynamic Systems, Random Processes, Complexity Analysis.

University of Colorado Boulder *Boulder, CO*

B.A. in Astrophysics and Minor in Music (Harp performance), GPA 3.86 August 2018 - May 2022

Coursework: Data Structures, Algorithms, Scientific Programming, Classical Mechanics, Quantum Mechanics, Electricity & Magnetism, Astrophysics.

Technical Skills

Programming Languages Python, C++, bash, LaTeX. *Working knowledge:* SQL, Scala, JavaScript, HTML/CSS

Data Science PyTorch, TensorFlow, HPC, Pandas, Matplotlib, SLURM, GCP. *Working knowledge:* MATLAB, Mathematica

Employment and Research

University of Hawai'i at Mānoa *Honolulu, HI*

Graduate Research Assistant August 2022 - present, full-time

Research **probabilistic machine learning** with Dr. Peter Sadowski, applying **Gaussian Processes** in **Python** for anomaly detection and accelerating **simulation-based inference** via **neural likelihood models** [2].

NVIDIA *Santa Clara, CA*

SW-GPU Intern, PhysicsNeMo/Earth-2 Teams July 2026 - October 2026, full-time

Researched deep learning applications for climate science, developing generative satellite and radar weather models.

NASA Jet Propulsion Laboratory, Caltech *Pasadena, CA*

Research Intern, Machine Learning and Instrument Autonomy Group March 2026 - June 2026, full-time

Optimized ionospheric deep learning architectures to reduce runtime and built evaluation pipelines across geomagnetic storm conditions [1].

Frontier Development Lab *Remote*

Researcher at HelioLab June 2025 - October 2025, full-time

Developed a novel dataset and deep learning models in **PyTorch** to forecast ionospheric dynamics, presented at NeurIPS [3, 4].

Striveworks, Inc *Austin, TX*

Data Science Intern May 2023 - August 2023, full-time

Researched **large language models** for NLP tasks, evaluating parameter-efficient fine-tuning strategies such as LoRA.

Laboratory for Atmospheric and Space Physics *Boulder, CO*

Undergraduate Research Assistant August 2020 - July 2022, part-time

Implemented K-means and **CNNs** in **PyTorch** to segment solar polar coronal holes [6].

MIT Haystack Observatory *Westford, MA*

Research Experience for Undergraduates May 2021 - August 2021, full-time

Applied GMMs and **CNNs** to detect ocean wave events in seismic data from Antarctica's Ross Ice Shelf.

Institute for Astronomy at the University of Hawai'i at Mānoa *Honolulu, HI*

Research Experience for Undergraduates May 2020 - August 2020, full-time

Analyzed the entire Kepler Space Telescope dataset using **Python** statistical tools such as **Pandas** to evaluate the biases in its selection function [5].

Awards and Honors

Jan. & May 2024 Catalyst Award for Science Advancement (CASA) Grant for Outreach with Graduate Women in Science Hawai'i

April 2022 National Science Foundation Graduate Fellowship
